B. Tech. III - Sem. (Main) Exam., May – 2023

Computer Science and Engineering

3CS4-05 Software Engineering

Common to CS, IT, AI, DS, MC, CM, CD, CA, AD, AM, CY, IO

Time: 3 Hours **Maximum Marks: 70**

Instructions to Candidates:

Part – A: *Short answer questions (up to 25 words) 10 × 2 marks = 20 marks. All **ten** questions are compulsory.*

Part – B: *Analytical/Problem solving questions 5 × 4 marks = 20 marks. Candidates have to answer **five** questions out of **seven**.*

Part – C: *Descriptive/Analytical/Problem Solving questions 3 × 10 marks = 30 marks. Candidates have to answer **three** questions out of **five**.*

Schematic diagrams must be shown wherever necessary. Any data you feel missing may suitably be assumed and stated clearly. Units of quantities used/calculated must be stated clearly.

Use of following supporting material is permitted during examination. (Mentioned in form No. 205)

1. NIL 2. NIL

PART – A

Q.1 What is meant by Software Engineering?

Q.2 What are the non-functional requirements of software?

Q.3 What is software project management?

https://www.btubikaner.com

Q.4 What is UML?

Q.5 What are the design methodologies?

Q.6 Mention the importance of coupling.

Q.7 Enlist any two disadvantages of Waterfall model.

Q.8 What are the challenges of software engineering?

Q.9 Enlist the names of models available in SDLC.

Q.10 What do mean by Risk?

PART – B

Q.1 Explain briefly about requirements validation.

Q.2 Explain prototyping analysis.

Q.3 Differentiate data-oriented requirements analysis and object-oriented requirement analysis.

Q.4 Describe any four basic elements used in Data Flow Diagram (DFD).

Q.5 Illustrate the steps used in the Constructive Cost Estimation Modal.

Q.6 Differentiate between FP and LOC.

Q.7 What is the role of Abstraction and Polymorphism in object-oriented model that are needed to begin with UML?

https://www.btubikaner.com

PART – C

Q.1 What are software requirements? How to analysis the requirements?

Q.2 Explain briefly about project management in detail.

Q.3 Describe the phases involved in the COCOMO model to estimate effort.

Q.4 Illustrate Finite State Machine (FSM) models in detail.

Q.5 Describe Conceptual Modeling in UML in detail.
